(54) ELECTRONIC EQUIPMENT

(57)Abstract:

PROBLEM TO BE SOLVED: To facilitate confirmation of an application screen during activation and switching operation in an electronic equipment such as a portable telephone capable of activating a plurality of applications at the same time.

SOLUTION: While a mail creating application and a telephone directory application are being activated at the same time, a CPU 14 switches the directory book application to the mail creating application without completing the telephone directory application during the activation of the directory book application in response to a press-down signal of a best voice key 16e (step S404). At this time, the telephone directory application and various data in connection with its running are held (step S405) and an LED 21 for receive is lit, thereby reporting it to a user (step S406).

LEGAL STATUS

[Date of request for examination] 13.02.2003

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 3866032

[Date of registration] 13.10.2006

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
